

PPC QuikPass™ Fiber Entry Box

The PPC QuikPass™ Fiber Entry Box is a slim profile, compact termination box at the heart of the PPC QuikPass solution. Manufactured from a flame-retardant, low-smoke, zero-halogen and impact-resistant polymer, the box mounts to wall surfaces with two screws (provided).

The PPC QuikPass Fiber Entry Box is positioned over the PPC QuikPass Miniflex® Distribution Cable and provides retaining features to hold the cable securely. After window-cutting the cable, individual 900µm fibers can be pulled back and coiled into the box.

The PPC QuikPass Fiber Entry Box features all the necessary components to connect the subscriber to the distribution cable and offers a range of termination options including fusion splice, field-fit connectors and terminated drop cables. It even allows for pushing the fiber from the Fiber Entry Box to the Customer Terminal / Optical Network Terminal (ONT).

Advantages:

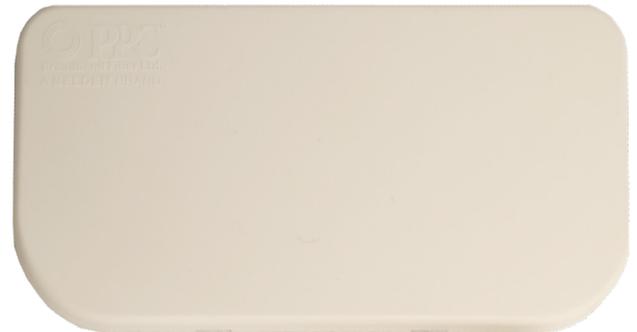

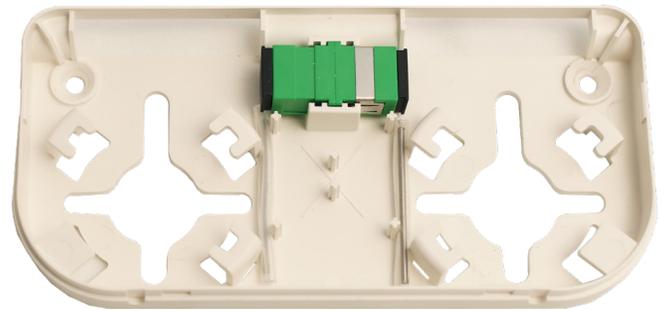

- Drop cable can enter at rear or bottom of the box
- Tamper-resistant front cover
- Slim compact profile
- Cable retention features
- Multiple termination options
- Supplied with wall fixings and connection accessories

Applications:

- Multi-dwelling units
- Commercial offices
- Schools and campuses
- Hotels and resorts

Compatibility List:

- Miniflex 2mm, 3mm and 8mm
- G.657A2 Optical Fiber
- SC/APC Connectors
- Fusion and Mechanical Splice

Part Number	Kit Version	Kit Contents
