

2U Cable Manager

Features & Benefits

- 2U, 19" Standard Panel (IEC 60297-3)
- Secures and retains patch cables
- Maintains proper bend radius
- Cable transition from horizontal to vertical channels
- Standard size for mounting in 19 inch rails
- Ideal for managing excess fiber or copper cable slack within a rack
- Includes 5 spools which can be rotated in 180° steps
- Includes 2 G-clips
- Includes fixing material
- Modern design and simplicity of mounting
- Bend radius plate available for both sides
- Accessories for vertical mounting available
- Material: Aluminium Alloy 2.0mm thick - grey RAL 7035 or black RAL 9017

Overview

The 19 inch 2U cable manager from PPC is made of aluminium and powder-coated in grey or black. It is used to route cables while maintaining minimum bending radius and to guide and accommodate cable reserves and excess lengths. The cable manager has five coils, two G-clips, and four cable guides each at the top and bottom. This innovative design offers many possibilities for guiding and storing cables safely and organized. Depending on the application/cable routing, the entire cable manager can also be mounted in a 180° rotation in the 19 inch rail. The cable manager is compatible with any 1 inch rack or cabinet.

As an accessory, PPC offers a rounded cable guide (Bend Radius Plate), which simplifies the lateral deflection of the cables around the 19 inch rail.

PPC offers a T-Adapter Set as an accessory for lateral, vertical mounting on a 19 inch rail.

PPC's cable management products provide excellent support when used in conjunction with other PPC 19 inch products.
