

Demarcation Enclosure

Model PHB1093XX

Features & Benefits

- Weather-resistant thermoplastic housing
- Removable back section for covering unsightly installations
- Open-ended cable slot for easier and faster installations
- Dedicated 1 in conduit opening
- Easy access design
- Locking lid with included hardware
- Slack storage loop

Overview

PPC's PHB1093XX demarcation enclosure provides a secure compartment for coax and fiber installations. The enclosure's removable hinged lid has a section that allows for the display of your company's logo. The enclosure latches with two side snap latches, and can be safeguarded with a zip-tie or padlock. The unique design allows for easy access to any equipment, and a lid that stays open when needed. The internal mounting arrangement allows for a standardized method of installing coax or fiber drop components.

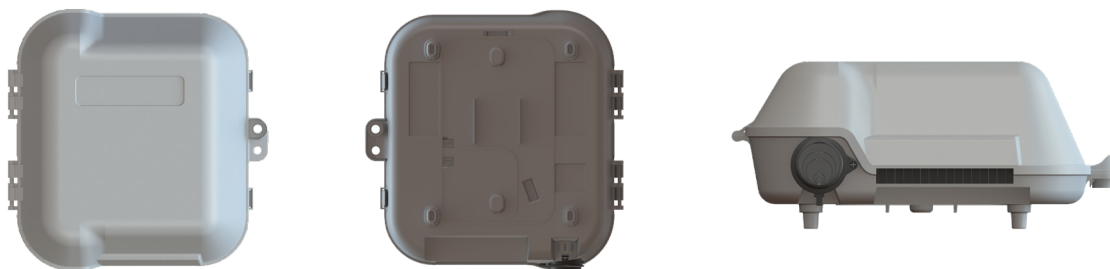

All mounts are the same height and spaced in 1/2 in increments per industry standards. To help cover unsightly cable portals and/or components on the side of a home, the back of the enclosure incorporates a unique two piece tearaway 3 in x 3 in section that can easily be removed via a pull-tab depending on the size needed (9 in x 4 in or 3 in x 3 in). The open-ended, self-sealing, cable slot at the bottom of the box allow components to be assembled outside of the enclosure making for quicker installations, and eliminates entry points for insects and moisture. The dedicated 1 in conduit opening accepts a variety of cables sizes (from 1/8 in to 1 1/8 in or 3 mm to 28 mm).

Technical Data

UV Resistance	Salt Fog	Chemical Resistance	Material
30 days per ASTM G26-93	60 days per ASTM B117-90	30 days at 100°F and 95% RH resists chipping and/or cracking when subjected to household chemicals	Copolymer Impact Polypropylene
Dimensions External (HxWxD)		Dimensions Internal (HxWxD)	
11 1/8 in x 10 1/8 in x 5 in		10 in x 9 in x 3 in
