Cable Manager
19" Brush

PPC®
A **BELDEN** BRAND
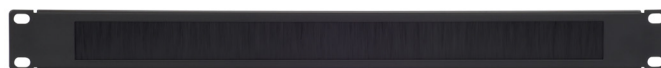

Features & Benefits

- Secures and retains patch cables
- Maintains proper bend radius
- Cable transition from front to the rear
- Improves cooling efficiency
- Brush bristles prevent dust from entering
- Standard size for mounting in 19" racks and cabinets

Overview

PPC's 19-inch 1U Brush Cable Manager allows the user to pass patch cords from the front of the cable manager through the brush entry and exit out the rear, making for an aesthetically-pleasing look to the cabinet. The brush cable manager is constructed of high-quality steel and high-density nylon bristles. The nylon bristles block unwanted airflow in open spaces, keeping energy consumption low.

The brush cable manager supports excellent cable management when used in conjunction with other PPC 19" products. The cable manager is designed for use in 19" rack environments for managing patch cords that are connected between patch panels and the network switch.

It's recommended that one cable manager is mounted between every patch panel or a network switch. The cable manager meets EIA-310-E standards and is compatible with any 19" rack or cabinet.

Applications

- Standard 19" rack compatible
- Data Centers & MDF/IDF racks and cabinets
- Used between patch panel and network switch in racks and cabinets

Standards

- IEC 60297-3
- EIA-310-E
- DIN 41494-1, 7
