Features & Benefits

- Removable front cover
- Finger guide channels at the top and bottom of the cable manager
- Openings for routing patch cables from the rear side
- Secures and retains patch cables
- Maintains proper bend radius
- Cable transition from horizontal to vertical

Overview

PPC's 19" 1U/2U duct cable manager is constructed using steel and finished in powder coated black. The duct cable manager comes with a removable front cover, a finger guide channel on the top and bottom and an opening at the rear for duct pass-through. The finger guide channels allow the patch cords to enter and exit at any point, and provide a pleasing look to the cabinet.

PPC's cable management products deliver excellent support when used in conjunction with other PPC 19" products. The cable manager is designed for use in 19" rack environments for managing patch cords that are connected between patch panels and the network switch.

It's recommended that one cable manager is mounted between every patch panel or network switch. The cable manager is designed to meet EIA-310-E standards and is compatible with any 19" rack or cabinet.

Applications

- Standard 19" rack compatible
- Data Centers & MDF/IDF racks and cabinets
- Used between patch panel and network switch in racks and cabinets

Standards

- IEC 60297-3
- EIA-310-E
- DIN 41494-1, 7
