- Modular mounting brackets can be daisy-chained using tab and slot feature
- Can be removed from bracket and installed in select FutureLink[®] enclosures
- Easily installable and removable using snap-fits
- Mounting hardware provided

Overview

The PPC Miniflex microduct organizer is a plug-and-play solution intended to simplify multi-dwelling unit (MDU) installations where multiple cable pathways are present. Using modular mounting brackets that are capable of being mounted in any orientation on a flat surface and linearly daisy-chained together, microducts can be neatly arranged in increments of 24, saving installation time and effort.
