# Diamond® Drop Hanger
Installation Instructions

Step 1
Separate at least 2 ft of messenger wire from the coax cable; Arrange the drop hanger clamp so the clamp ring is on the side with the cut end

Step 2
Insert the cable into the clamp first, followed by the messenger wire, and feed the end of the messenger wire through the clamp ring; The point where the coax cable and messenger wire connect should be at the rounded end of the clamp.

Step 3
Bend the messenger wire 180° over the rounded end of the clamp and pull it flat against the backside of the clamp

Step 4
Holding the messenger wire tightly against the clamp, thread the wire through both L shaped Slots

Step 5
Wrap the messenger wire twice around the clamp body and through the L shaped slots, stopping where the cable exits the clamp

Step 6
Pull the messenger wire parallel with the exiting cable and cut the excess wire to about 1 ½ in

Step 7
Make sure the wire end is wrapped tightly around the clamp at the L Slot and tuck the wire into the clamp toward the clamp ring
