

Overview & Features

The **Perfect Flex**® coaxial cable product line offers superior performance, unmatched quality, and a reliable, durable design built to withstand the harshest of environmental factors.

Perfect Flex cables feature PPC's unique **Perfect Braid**® design that delivers a greater number of picks per inch than most other braid designs. This feature leads to superior shielding effectiveness compared to other tri-shield cables. It also ensures the highest level of protection from signal interference and associated quality of service issues.

Product Features:

- Micro-crack resistance with superior results in flex testing
- Manufactured with 100% RoHS compliant materials
- Perfect Prep® available on tri-shield constructions
- Perfect Guard® corrosion resistant protectant, designed to eliminate moisture migration into the cable
- APD (amorphous polypropylene flooding compound) available for aerial cable
