

# Fiber Management Duplexer

The PPC Duplexer enables multi-fiber cables to be divided into two tails of 3mm or 5mm Miniflex™ tube. Miniflex™ tube is anti-kink, bend limiting and crush resistant.

The Duplexer features fiber lay-through design. Miniflex™ tube from 3 to 8.5mm OD can be used at the input port or a range of other competing products.

This PPC Duplexer is a tough, rugged, compact and lightweight component. The construction of this assembly is such that it requires no crimping.

**It is quick and versatile for Duplex patch cords, pigtails and general cable management in racks or any environment requiring fiber management.**

## Features & Benefits
