

Fiber Splice Tray

Features & Benefits

- Designed as per industry fiber management specifications for acceptable bend radius
- Maintains fiber bend radius greater than 35 mm
- Storage area for fiber extra lengths
- Holds the fiber splice securely with built-in fiber management tabs
- Loose tube and pigtails tie-down positions with provision for easy cable tie insertion
- Variety of splice trays with built-in fiber splice protector holder or removable splice holder
- Facilitates better fiber management inside the patch panel

Overview

PPC splice trays offer a safe and convenient solution for splicing of optical fibers. They are equipped with splice holders, compatible with all standard types of heat shrink or crimp type splice protectors, and provide enough space for storage and management of the excess fiber. PPC offers a comprehensive portfolio of splice cassettes with different size, capacities and types of splice protectors.
